Why Choose Detectamet ?

Detectamet is a youthful and innovative company established in 2003. With enthusiasm and foresight in abundance we are able to offer our customers what we believe to be the largest range of detectable products in the world. Our key focus is the design, manufacture and development of detectable products. Bringing both tried and tested concepts along with new ideas to the market place.

Detectamet™Ltd is ISO 9001:2008 accredited. The approved quality management systems apply to the following: The design and manufacture of metal detectable products, respiratory, hearing protection and other related products. Certificate number GB 18600.

Mission Statement

"We pride ourselves in offering what we believe is a service second to none to the global market, coupled with our commitment to quality and innovation in design for our wide range of detectable products, personal protective equipment and stationary items. We are proud of and pioneering in our proactive approach to the ongoing changes in industry. We strive to build on our strengths as a group of companies, allowing us to expand our current markets and continuously explore new opportunities.

Who Needs Detectamet Detectable Products?

Within many industries today there is an ever-present risk of product contamination from foreign objects that, if undetected, can result in damage to equipment, costs incurred through product recalls, harm to the company's reputation and, in the worst case, serious injury to somebody inadvertently coming into contact with the contaminant. These industries include the food industry (human and animal), beverage, pharmaceutical, cosmetics, textiles and many others.

Are You Protecting Your Customers?

Statistics show that the Food, beverage and pharmaceutical industries are most at risk from foreign body contamination issues - due to consumers who may inadvertently ingest foreign matter within a finished product. Consumer complaints are a constant problem for most food companies and so prevention and control should be high on the list of priorities for quality and technical managers with support from product development, purchasing, distribution etc.

The law states that "*Food fails to comply with food safety requirements if it is unsafe for human consumption or it is so contaminated (whether by extraneous or otherwise) that is would not be reasonable to expect it to be used for human consumption in that state*" Section 8 (2) (B & C) of the Food Safety Act 1990.

It is intended that the more risk-based and flexible procedures will better match the needs of individual businesses and enforcement agencies. This is facilitated by the introduction of food safety management procedures based on the application of Hazard Analysis and Critical Control Points (HACCP) principles. HACCP-based principles are widely regarded throughout the EU and in most developed countries as crucial to the management of food safety and, in turn, consumer protection. On 1 January 2006 it became a legal requirement for all food businesses (except primary producers) to put in place, implement and maintain a permanent procedure or procedures based on HACCP principles.

The law allows defences for all reasonable precautions and all due diligence when a company may be faced with a prosecution for a foreign body complaint.

Detectamet's Legislative Adherence To HACCP

These principles prescribe a certain number of requirements that must be met throughout the cycle of production, processing and distribution in order to permit, via hazard analysis, identification of the critical points that need to be kept under control in order to guarantee food safety: identify any hazards that must be prevented, eliminated or reduced to acceptable levels; identify the critical control points at the step or steps at which control is essential; establish critical limits beyond which intervention is necessary; establish and implement effective monitoring procedures at critical control points; establish corrective actions when monitoring indicates that a critical control point is not under control; implement own-check procedures to verify whether the measures adopted are working effectively; and keep records to demonstrate the effective application of these measures and to facilitate official controls by the competent authority.

Quality Assurance

Detectamet offer materials and products that have been developed to help industry comply with new global regulations to protect consumers and employees. Detectamet products give manufacturer's the opportunity to use cost-effective, functional, ergonomic implements that are suitable for use in industrial environments, and approved for food contact use. A key feature of the products manufactured from these materials is that fragments are detected and rejected by standard in-process metal detection and X-Ray equipment. All our products are tested and meet current EU legislation along with other international requirements. Full data sheets, MSDS are available for all our products, and all come with Certificate of Conformity.

Detectable products are made from various non metallic materials, those that offer the best capabilities for food applications that cannot always use a metal alternative. These products are often specified by industry in alternative materials as they are most suited to the applications.
However, standard non-detectable implements can present serious risk of foreign body product contamination.

Detectamet products are made with a proportion of a metallic magnetic trace element which is present through out the whole object, this is at a size and concentration that allows a homogeneous flow throughout, ensuring that all parts are potentially detectable by metal detection systems but without changing the physical properties of the object. Other products have a metallic strip etc bound to the product.
X-Ray machines have an advantage over metal detectors in being able to detect a wider range of foreign bodies - this is because the foreign body must be significantly different from the food or other material in X-Ray density in order to be detected.
In practice an X-Ray machine will be able to detect items such as glass, metal, stones, bone and some denser plastics, for example PVC.
However, standard plastic films, paper, cardboard, wood, insects, string or fruit stones will not be picked up!
Detectamet Super-X (X-Ray visible plastic) has been developed to work in conjunction with metal detection and x-ray detection systems, using an x-ray visible trace element which is present throughout the whole object and increases its density. Therefore allowing detection of foreign body contamination to the end of the production line.

Detectamet products are all detectable - but there will be a cut off point. This will not be systematic for all customers and indeed for all machines/lines or sites.
There is no 100% guarantee of zero risk with any detectable products.
Even metal - have you ever considered why small pieces of metal are able to get into production lines?

There will always be a limit as to at what point the Detectamet material (or any detectable material) will stop being detected!
This point will generally be when the metal content in the object is smaller than the settings you are using. At this point any metal foreign object will pass through your system. Metal detection systems are a safeguard to a point.
Or the density of the foreign object is less than the product you are running.

Manual inspection should not be forgotten - All detectable products come in bright blue as standard, but are available in a range of high visibility colours not commonly found in food products or our colour coding can be used to identify areas of high risk or shift patterns.

Metal detection and X-Ray detection is not a precise science. Machines may be very accurate, high tech and high specification instruments but there are many variable's to consider:
Type of food or product
Density
Packaging
Speed and orientation of the metal
Detector settings
Sensitivity and age, to name the most common ones!

Contrary to the rule - many Detectamet products will be detected in general better within a wet environment rather than dry - but will achieve good results to implement into HACCP for all areas.

Lost or found?
Ask yourself this important question : By what percentage am I now safeguarding my customers? - If you have a non metal detectable pen you have 100% chance of facing an issue caused by the potential of a lost pen. If you have a Detectamet pen which can detect to a piece as small as 5mm then you have a 95% chance that lost pen will be found.

Remember that Detectamet products show that you are using all due diligence, and you have taken the best precautions available.

We strongly advise that you always carry out in house tests on all the Detectamet products.

Please contact us direct if you are experiencing and problems with the detection of our products and we will be happy to offer you our advice and assistance.

Metal Detection Results (Showing Variables)

Purpose of this Report

This report has been compiled as a summary to the samples supplied for testing and to establish the spherical equivalent for the samples in both WET and DRY modes of operation on the detector. Tests carried out: Tests were carried out on a Phantom 350mm x 200mm operating at 150Khz with the Dry Phase set at 90.83 (typical dry set up) and Wet Phase set at 2.19 (typical wet set up) and in both cases the sensitivity has been set to 100.

Results

Sample Ref:	Equivalent sample size in DRY mode (Fe)	Equivalent sample size in WET mode(Fe)
Big Single Plaster	2.5mm Fe	1.5mm Fe
Small Single Plaster	2.0mm Fe	2.5mm Fe
Brush Bristle	0.5mm Fe	1.0mm Fe
Small O Ring	1.5mm Fe	4.5mm Fe
Large O ring	3.5mm Fe	7.0mm Fe

Explanation

It is probably best to give an example to explain the results above.

Example 1
Your customer is running OATS as a product and as a result the detector would run DRY. If your customer is currently working to a sensitivity of 2.0mm Fe he would be able to detect the following:
• Small plaster
• Big plaster
• Large O ring

Example 2
Your customer is running CHILLED MEAT as a product and as a result the detector would run WET. If your customer is currently working to a sensitivity of 2.0mm Fe he would be able to detect the following:
• Small plaster
• Small O Ring
• Large O ring

The only time you are likely to find the brush bristle is if the customer has detection levels of 0.5mm Fe or lower for DRY products or 1.0mm Fe or lower for Wet products.

Note
There is a slight anomaly related to the plasters as we would expect the larger plaster to exhibit larger effects but the reverse is being demonstrated. This we believe is down to the small plaster having different / more additives to make it X-Ray detectable.

X-Ray Detection Results (Showing Variables)

Product Tests were carried out on our range of Detectable Products. Using our X-Ray equipment at MT Safeline Ltd, we can now advise you of our test results as follows:

The tests were carried out using a Safeline AdvanChek X-Ray System, & the sample X-Ray Visible Plasters were presented on the conveyor belt in their 'worst case' orientation which means they would give the least signal level to equate them to a spherical metal test standard.
If the plasters are presented differently, or in a way as if they became detached from the wearers hand, then the signal levels can become greater & they may become more easily detected.

3 Flange Earplug
These products gave a detection level equivalent to that of a 1.5mm S/S spherical ball when presented to the X-Ray System in their worst case orientation.
This is a good result & these products should be detected in most applications if a detection spec of 1.5mm S/S or smaller is achievable for the customer's products.

Disposable Earplug
These products gave a detection level equivalent to that of a 2.0mm S/S spherical ball when presented to the X-Ray System in their worst case orientation.
This is a good result & these products should be detected in most applications if a detection spec of 2.0mm S/S or smaller is achievable for the customer's products.

Beard Snood / Hair Net
These products gave a detection level equivalent to that of a 1.5mm S/S spherical ball when presented to the X-Ray System in their worst case orientation.
This is a good result & these products should be detected in most applications if a detection spec of 1.5mm S/S or smaller is achievable for the customer's products.

Here are some of the images of plastic that I tested in our glass line x-ray. The results were very exciting, and quite clear images from the machine. We were able to reliably detect down to a 3mm piece. I have sent this & the presentation you sent through on to the head of quality.

These images were taken at 550 jars per minute on a Quad beam x-ray. I firstly tried the plastic in water, then on the smallest piece I actually had it in the product (Seafood sauce) to really test out the plastic's limits. Jars are 250 gram of 1.5mm wall thickness.

Metal & X-Ray Detectable Products

Contents

The Detectamet stationery range has been developed for food processing and similar applications. Made from metal detectable X-Ray visible polypropylene materials which are high impact resistant. All our products are food contact approved meeting the requirements of regulation 10/2011 and 2002/72/EC and amendments (all migration testing is still undertaken according to 2002/72) and comes with a certificate of conformity.

All our inks are non toxic, meeting the requirements of ISO12757-2 (The International Organization for Standardization published standards for ball point and roller ball pens). Declarations of conformity can be issued for all products.

Detectable Retractable Pens
Detectamet Retractable pens are suitable for almost all food related environments, including those with greasy and powdery conditions. This pen performs well in both warm and lower working temperatures. Retractable housings offer extra protection for the pen refill and the operator, ensuring that the nib will not become damaged if the pen is dropped or rolls off work surfaces. This pen is safe for the operator to carry in a pocket. Now with new and improved high quality refills. These pens can be refilled. Available in metal detectable only or metal detectable and x-ray visible.

METAL DETECTABLE	MD & X-RAY VISIBLE	DESCRIPTION	PACK QTY

Detectable PDA Stylus

Touch screen personal digital assistant stylus - This is a one piece stylus - no seperate parts. Made to be compatible with most pda screens (These are Pen Based computers made by Palm, Handspring, Hewlett Packard, Casio and others)
Non scratching.
The Detectamet stylus is made of a firm but non-scratching plastic to "write" on today's very popular Personal Digital Assistants (PDAs).

CODE	DESCRIPTION	PACK QTY
DTM 0023	Pen Style PDA Stylus	1

Detectable Stapless Stapler

Eliminate the risk of contamination caused by wayward staples. This unique product cuts, folds & securely fixes up to 5 sheets of paper and is available in a range of colours (detectable in blue only). Contained durable unit for added contamination reduction - available in detectable or non-detectable material. Easy to use and suitable for all industries. Can be used in compliance with environmental policies.

CODE	DESCRIPTION	PACK QTY
DTM 1000 MD	Detectable	1
DTM 1000	Non-Detectable	1

Detectable Paper Clip

An exclusive and new product from Detectamet!
Jumbo paperclip is made from detectable polymer and is suitable for a range of applications (has been used as a detectable keyfob) as well as complimenting our stapless stapler when larger quantities of paper need to be temporaraly secured.

CODE	DESCRIPTION	PACK QTY

DTM 2100 B	Desktop Calculator	1

Detectable Handheld Calculator

The Electronic hand held calculator is compact and lightweight. The plastic casing is detectable. Designed to be held in your hand/pocket or attached to a clipboard. Measures 10cm x 5cm.
This calculator can be used with or without safety chain due to the special design.
Handheld Electronic Calculator - Battery Powered only DC AG101.5V
Please note the life of your battery will depend on your working environment.

CODE	DESCRIPTION	PACK QTY
DTM 2000 B	Handheld Calculator	1

Detectable Rulers

Detectable Plastic Rulers manufactured from Detectamet food safe Detectable Plastic.
Benefits Include:
• Metal Detectable
• Available in 2 sizes: 30cm / 12" &   15cm / 6"
• Measurements (Imperial & Metric Scale) are moulded down either side of the ruler.
• Blue Colour
• Bevelled Edge acts as an excellent drawing and drafting guide.
• Easy to Clean
• Food Safe
• Durable
• Can be used as part of HACCP

CODE	DESCRIPTION	PACK QTY
DTM 3001	15cm / 6" Ruler	5
DTM 3002	30cm / 12" Ruler	5

Detectable Scissors

General Purpose Scissor. Blades manufactured from Stainless Steel. Size: 8.5 inch / 210mm.
Food Safe Detectable Plastic Handles.

By law we cannot sell this product to any person under the age of 18.

DETECTABLE STATIONERY

Detectable Plastic Clipboard & Memo Holder

Made using Detectamet's unique detactable plastic polymer and has the added bonus of an anti-microbial agent.
- Extremely lightweight
- Ability to wipe clean
- Comes with stainless steel clip
- Stainless steel clip can be etched with your company details

Colours available - Red, Green, Blue and Yellow.

CODE	DESCRIPTION	PACK QTY
DTM 0910	A4 portrait - c/w s/s clip weight 280g	1
DTM 0929	A5 Memo Card Holder weight 280g	1

Detectable Swipcard Holder

Swipe Card access systems are a popular and simple but effective way to control access in and around any building, generally used for commercial buildings within the food, pharmaceutical industries etc; a simple swipe or proximity card would be presented to a card reader located outside the door. When the card is read by the card reader the door will automatically unlock for a predetermined time. Available in blue only with or without safety chain.

CODE	DESCRIPTION	PACK QTY
DTM 0026	Swipecard Holder	1
DTM 0027	Swipcard Holder with Safety Chain	1

Detectable Split Ring & Chain

Detectamet Split ring & Chains are suitable for food applications, and anywhere a safety chain is required.
The Chain supplied as standard is 30" long and nickel free, the design of the chain will allow it to break if caught in machinery etc.
Longer lengths available on request.
The splitring is supplied as standard 20mm diam.
Suitable for use with all Detectamet pens that have a clip, Keyfobs etc

CODE	DESCRIPTION	PACK QTY
DTM 0015	Split Ring	1
DTM 0025	30" Safety Chain	1

Detectable Cable Clamp

Detectable cable clamp is strong and durable, manufactured from Detectamet Food Safe Detectable Plastic. This detectable component is a releasable and reusable device for organizing all cables, ropes, belts, wires, cords, hand tools, office and computer peripherals.

CODE	DESCRIPTION	PACK QTY
DTM 02912	Small (11mm - 29mm)	2
DTM 22912	Large (23mm - 53mm)	2

Detectable Flexible Scrapers

The products in this range are all produced from a specially formulated material based on high impact food safe polypropylene. This material has the ability to be detected and rejected by typical metal detection and x-ray machines used in the food processing industry. To bring this range into line with typical colour coding systems, our metal detectable range is available in red, blue, green, yellow and now also in white.

CODE	DESCRIPTION	PACK QTY
DTM 0817	flex scraper - small	1
DTM 0818	flex scraper - large	1

Scraper With Detectable Handle

The products in this range are all produced from a specially formulated material based on high impact food safe polypropylene. This material has the ability to be detected and rejected by typical metal detection and x-ray machines used in the food processing industry. The blade on these scrapers are made from stainless steel for more robust applications.

CODE	DESCRIPTION	PACK QTY
DTM 0840	flexi scraper - s/s with detectable handle	1
DTM 0841	rigid scraper - s/s with detectable handle	1

Detectable Hand Scraper

The products in this range are all produced from a specially formulated material based on high impact food safe polypropylene. This material has the ability to be detected and rejected by typical metal detection and x-ray machines used in the food processing industry.

Detectable Storage Containers

• Full dispersion of detectable elements throughout the product
• Available in 2 Sizes/5 Colours
• Stackable and Non-Stackable
• Lightweight and easy to handle
• X-Ray visible
• Magnetically Detectable
• Tough and durable
• Easy to clean

CODE	DESCRIPTION	PACK QTY
DTMDTSC 0886	Small Stackable - 310 x 425 x 74 mm	1
DTMDTSC 0887	Large Non-Stackable - 312 x 428 x 158 mm	1

Detectable Ingredients Bins

New and exclusive to Detectamet for 2011. Detectable ingredient storage solutions are now available.

Available with or without castors, the Catering bins / Wheeled Trolleys are designed with a rolled over lip to ensure strength and ease of handling. Each bin has a smooth interior for ease of cleaning and the wheeled bins are supplied with 2 fixed and 2 Swivel castors for easy transportation.

Each Detectable Catering Bin is made from food safe Detectamet Detectable Polyethylene, a tough and durable material.

Detectamet Detectable Catering Bins are available in 60 litre and 100 litre sizes and can be purchased with or without lids.

Detectamet Detectable Wheeled Trolleys are available in five different sizes ranging from 125 litres to 400 litres. Without lids only.

Blue Food Safe Metal Detectable Plasters and dressings.

We offer a wide range of Detectable plasters and dressings to suit every customers needs and budget. Electro-Magnetic Detection and visual blue plasters/dressings are ideally suited for the food industry where the necessary detection equipment is operational.

Key benefits include :-

- Hypoallergenic adhesive.
- Blue in colour to assist detection
- Sterile and individually wrapped
- Allows skin to breathe
- Micro porous structure
- Complies with Food & Hygiene regulations SI1990 & No1431
- Comprehensive Range
- Conformable
- Washproof

The SK Series of Safety Knives and Cutters can offer you a wide range of knives to suit most applications.
Lost or unlocated cutters in food operations can now be readily detected!
All cutter bodies are made from metal detectable material, and are supplied as standard in blue. Other colours are available on certain styles.

GS Tested for Safety technology
Stainless Food Contact Approved blades
The basic criteria for a knife or cutter to be included in the Detectamet range of metal detectable safety cutters will meet with the following:
A genuine safety knife with a safety index of 4 or less(1 = bladeless, 2 = enclosed blade, 3 = fully automatic blade retraction, 4 = semi automatic blade retraction, 5 = manual blade retraction)
A knife which has a low risk of breaking into fragments with min parts

We can also supply the range of safety knives and cutters in standard non-detectable materials.

SAFETY KNIVES

Detectable SK 100

This plastic sheet cutter offers 2 advantages. A highly simplified blade change routine plus the integrated metal slitter (removable) to cut cardboard box adhesive tapes. For trouble free work with thick plastic sheeting , leather, plastic box strapping.
• Fully Metal Detectable
• Plastic Sheet Cutter (also leather, plastic box strapping)
• Replaceable Blades
• Integrated metal slitter tool to open the blade cover
• The SK100 has a special tool to open the blade cover "preventing unauthorised access to the blade"
• Tested for Safety.

CODE	DESCRIPTION	PACK QTY
DTM 100	SK100 Knife With Security Key	1

Detectable SK 101

This plastic sheet cutter offers 2 advantages. A highly simplified blade change routine plus the integrated metal slitter (removable) to cut cardboard box adhesive tapes. For trouble free work with thick plastic sheeting , leather, plastic box strapping.
• Fully Metal Detectable
• Plastic Sheet Cutter (also leather, plastic box strapping)
• Replaceable Blades
• Tested for Safety.

CODE	DESCRIPTION	PACK QTY
DTM 101	SK101 Knife	1

Detectable SK 102

Made for use for right or left handers. The spring loaded blade retract system is designed to respond to any uncontrolled move if and when the thumb - push slider is NOT in forward position- let go of the slider when making the cut! Easy blade change and no extra tools required - just slide the blade mount insert back.
• Fully Metal Detectable
• Replaceable Blades
• Aluminium Body
• Spring loaded blade retract
• Tested for Safety

CODE	DESCRIPTION	PACK QTY
DTM 102 L/H	SK102 Left Handed Knife	1
DTM 102 R/H	SK102 Right Handed Knife	1

Detectable SK 104

Designed to cut packaging and wraps, this is a disposable knife and must be replaced when showing any signs of wear and tear.
The non replaceable blade is in a sealed handle for extra safety (no risk of loss from internal parts). This knife is a very simple and popular lightweight knife.
This knife can be safely pocketed and can be used by both right and left handers.
• Fully metal detectable
• Automatic blade retract for safety
• Tested for safety

CODE	DESCRIPTION	PACK QTY
DTM 104	SK104 Knife	1

FOOD SAFE DETECTABLE PRODUCTS

Detectable SK 109

The SK109 has a unique patented valley, which guides the material to be cut directly along the surgical steel blade. As the valley deepens, the pressure is increased onto the blade, the cutting action is more effective, thus taking the strain off the operator and increasing overall efficiency.
The patented valley is totally unique in the field of Safety Knives.
- Fully metal detectable.
- Hook and Blade punctures & box prevents damage to goods inside.
- Unique Vari Guard. Automatic spring loaded finger guards.
- No screws Fast blade change with internal storage for new & use.

CODE	DESCRIPTION	PACK QTY
DTM 0302 /B	SK109 With Hook Blue	1

Detectable SK 111

A revolutionary and unique break through in the field of Safety Knives. It is directly targeted at the most common uses for knives - Cardboard Boxes.
- Unique -Vari-Guard: Automatic Spring-Loaded Finger Guards, protect & retract when cutting
- Thumb grip for superior control
- Internal storage for new & used blades
- Blade will not break out of casing under stress
- Hook Blade punctures the box & prevents damage to goods inside.
- Straight Blade cuts conventionally with a 45degree angle.
- Only blunt edges of Hook Blade exposed. Protects fingers from sharp blade.
- Grip when wet
- No Screws - Fast blade change

CODE	DESCRIPTION	PACK QTY
DTM 0303	SK111 Knife (non detectable) -	1

Detectable SK 112

A revolutionary and unique break through in the field of Safety Knives. It is directly targeted at the most common uses for knives - Cardboard Boxes.
- Unique -Vari-Guard: Automatic Spring-Loaded Finger Guards, protect & retract when cutting
- Thumb grip for superior control
- Internal storage for new & used blades
- Blade will not break out of casing under stress
- Hook Blade punctures the box & prevents damage to goods inside.
- Straight Blade cuts conventionally with a 45degree angle.
- The SK112 has a special tool to open the blade cover preventing unauthorised access to the blade

CODE	DESCRIPTION	PACK QTY
DTM 0305	SK112 - Blue, with security key	1

Detectable SK 116

The "Bag Cutter" Safety Knife is specifically designed to cut multi-layer paper or plastic bags and sacks.
Moulded In Metal Detectable Plastic and with a Stainless Steel Blade
The patented opposed slopes at the back of the blade reduces friction resistance which enables a smooth and more effective cut.

CODE	DESCRIPTION	PACK QTY
DTM 0317	SK116 swan bag cutter - Blue	1

Tel: 01759 304 200
www.detectamet.com
sales@detectamet.com

Detectable SK 117

The SK117 is the latest addition to our Safety Knife range.
Moulded in Metal Detectable Plastic with Stainless Steel Blades.
- Patented 'opposed exits' at the back of the blade
- Spring loaded auto retractable hook blade
- Disposable
- Suitable for cutting strapping, paper, stretch and bubble wrap, tape, boxes and a variety of other packaging materials.

CODE	DESCRIPTION	PACK QTY
DTM 0319 /B /Y	SK117 c/w spring loaded hook - blue, yellow	1

Detectable SK 118

Larger more robust heavy duty version of SK 109.
- Replaceable blades
- 9mm mouth opening
- Tamper proof option
- Optional retracting hook
- Fast blade change and easy to clean
- Suitable for cable ties, rope, strinh and netting

CODE	DESCRIPTION	PACK QTY
DTM 0320	SK 118 Heavy duty cutter	1

Detectable SK 119

- The blade locks in the 'out' position whilst a controlled cut is being made. If the knife is jerked, shaken or dropped, the blade will retract.
- Lock control for safe storage.
- Moulded in tough glass-filled nylon.
- Easy blade change.
- Detectable plastic blade carrier
- Easy cleaning procedure.

CODE	DESCRIPTION	PACK QTY

Safebox & Used Blade Containers

A Safebox will fit in any coat or trouser pocket.
The Used Blade Container is for the collection and disposal of the used blades previously stored in the Safebox.
Used blades should never be dropped in a waste bin - they should be stored in the Detectamet Safebox, a simple innovation for the storage and disposal of used blades.
Blade bin - Designed for SAFE collection of used blades and, once completely filled, final disposal. Blade bin available in 0.6 litre, 7 litre, 13 litre and 24 litre sizes.

Detectamet can offer you an extensive range of Professional Knives and Accessories for use in the Catering, Food Processing and Industrial Markets worldwide. Our blades are guaranteed against defective materials and workmanship and are designed to offer long and reliable service to all professional users.

Hygiene / Handles & Blades
Our blades are made in the UK from fully hardened and tempered stainless steel and are easy to clean. Knives only require to be steeled occasionally in the normal way to retain a perfect cutting edge.
Our detectable handles are insert moulded from polypropylene co-polymer to withstand rigorous sterilising and dishwasher use and do not present the potential health hazards that are frequently associated with other knives. Handles are in two styles, the regular handle and the ergo handle. Colours are available in the following for which we recomend a coding system.
Blue (raw fish), Green(salad, fruit), Black (Vegetable), White (dairy & bakery), Yellow (cooked meat) and Red (raw meat).

PROFESSIONAL KNIVES

detectamet
FOOD SAFE DETECTABLE PRODUCTS

Detectable Professional Knife Handles

On the vast majority of the knives included in the Detectamet range, three handle types are available.

The Regular Handle - standard, polypropylene metal detectable handle, originally designed for holding the knife safely and comfortably for long periods.

The Ergo handle - polypropylene metal detectable handle, developed for the professional user who uses knives all day, our research and development team worked with various food processing companies to develop this innovative handle, the resulting design provides the following benefits-
• Double tapered design, ergonomically designed to reduce stress to hand and wrist
• Contoured thumb platform and rounded blade back for added comfort

The Ergo Safety Handle - polypropylene metal detectable handle, this is a hybrid version of the Ergo described above, but it has a much longer finger guard to protect the fingers and reduce the chance of injury.

All handles are insert moulded from metal detectable polypropylene co-polymer.

We recommend that a coding system is used for all Professional Knives in the range to prevent cross-contamination, tainting of food and to seperate production lines in the food industry.

Please insert (E) after order code to request the Ergo handle or (ES) to request the Ergo Safety handle. The regual handle will be sent if there is no prefix. For example DTM 47P609 (R) (ES). This would be a 9"/23cm Scimitar Butcher Knife with Red Ergo Safety handle.

Follow the chart for all working knives, surfaces and accessories. When placing an order please add the suffix R, B, Y, G or W to the code of your choice.

Professional Plain Edged Knife Blades

The traditional Plain Edge knife is manufactured with over 400 years of experience in knife making. The steel used, coupled with the heat treatment process, ensures a fine, durable long lasting edge.

Each production run is hardness tested as part of our stringent quality control system, this ensures that each knife will perform to its maximum capability.

The Plain edge range is used extensively in the meat processing industry where a long lasting fine edge is vital to ensure that maximum yields are achieved on the production line.

When placing an order please add the suffix R, B, Y, G or W to the code of your choice to request the colour coded handle, and then please insert (E) after order code to request the Ergo handle or (ES) to request the Ergo Safety handle. The regular handle will be sent if there is no prefix.

Professional Scallop Edged Knife Blades

To complement the traditional range of Plain Edge knives, we have introduced the Wavy or Scalloped Cutting Edge. This provides 40% more cutting edge in contact with the product than with a traditional plain edge knife.

Made to the same exacting standards, the Wavy Edge provides the perfect cutting edge profile for cutting items such as bread, gateaux and pastry products. The edge requires no sharpening, so is ideal for fast food outlets, busy canteens and restaurants.

The series of small scallops that make up the blade Edge are ground alternately on each side of the blade by hand with great precision. This ensures that each knife performs perfectly for the longest possible time by retaining a fine, razor sharp cutting edge for far longer than a traditional plain edge knife. The scallops also provide an additional benefit in that air is allowed to enter between the blade and the cut product, enabling the cut slice to fall away from the knife and not stick to it.

The blade Edge is available on any knife, but most popular on the Ham, Beef and Salmon slicer knives.

When placing an order please add the suffix R, B, Y, G or W to the code of your choice to request the colour coded handle, and then please insert (E) after order code to request the Ergo handle or (ES) to request the Ergo Safety handle. The regular handle will be sent if there is no prefix.

PROFESSIONAL KNIVES

Detectable Pallet Knives

Palette Knives which are manufactured in the traditional way come with fully detectable handles.

The test when choosing a Palette Knife is to press the blade onto a firm surface. It should bend from the middle of the blade, not near the handle. Keep pushing the blade so it is at 90 degrees to the handle. A Palette knife in the Detectamet range has the flexibility to allow it to return to a dead straight "rest" position time and time again.

www.detectamet.com
sales@detectamet.com

Detectable Mobcaps

We offer 2 styles of Mobcap. Our Standard Mobcap and our Premium Mobcap. Standard Mobcap - being detectable at 34645 and a light shade of blue, offering good protection and to meet budget requirements without compromising on quality.

Premium Mobcap - being more detectable at 40505 and extremely robust, ideal for those factories that are producing food products which make detection difficult due to the line settings and the packaging requirements, this Mobcaps is ideal for the customer who wants a thicker hair covering for employees with long hair etc. Many alternative products simply use a cheaper metalised tape which results in low detection or zero detection levels, and show potential for the strip to break away causing potential contamination of food products. Many alternative detectable mobcaps fail to meet the stringent quality checks in the food factories, causing loss of revenue to both distributors and end users and seriously damaging customer relations.

CODE	DESCRIPTION	PACK QTY

FOOD SAFE DETECTABLE PRODUCTS

Detectable Food Handling Vinyl Glove

The Detecta-Glove is a patent protected product. Made from detectable food contact safe vinyl and is powder free to avoid corn dust contamination. The material we use offers formulated comfortable fit and tactile sensitivity. A disposable glove which protects the hands while E.G. cleaning and cooking. Suitable for preparing vegetables, foods with a high water content, dairy products and pickled foods.
Please be aware: Detecta-Gloves are free of DOP (di-octyl-phtalate) but contain small traces of DEHP which are acceptable to European Standards.
This glove is suitable for use with all foods but with the exception of fatty foods.

CODE	DESCRIPTION	PACK QTY
DTM 0103	Vinyl Gloves - extra large	100
DTM 0102	Vinyl Gloves - large	100
DTM 0101	Vinyl Gloves - medium	100
DTM 0100	Vinyl Gloves - small	100

Detectable Mechanical Work Gloves

A heat proof detectable nitrile coated glove providing flexibility. Mechanical resistant and oil proof. Resistant to friction, tearing and cutting. Has superior piece clutching aspect both wet and dry pieces. Suitable for general protection, assembly, transportation, agricultural work and others.100% cotton interlock lining.
Conforms to standard EN 388 (3121).
Sizes available - 5,6,7,8,9,10,11.
We can supply a whole range of detectable nitrile gloves for various applications.
Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

CODE	DESCRIPTION	PACK QTY
DTM DNPR 16	Woven cuffed, upper hand part coated	5

Detectable Mechanical Work Gloves

Flexible and comfortable, taking the shape of the hand easily. Resistant to friction, tearing and cutting. Increases labour force in terms of performing work and holding the materials thanks to its special detectable nitrile coating it doesn't show oil or dirt. Has superior piece clutching aspect both wet and dry pieces.
Suitable for greasy environments, pressing, heavy metal work and iron sheet cutting. Durable against oil.
Conforms to standard EN 388 (4121).
Sizes available - 5,6,7,8,9,10.
We can supply a whole range of detectable nitrile gloves for various applications.
Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

CODE	DESCRIPTION	PACK QTY
DTM DNDB 16	Woven cuffed, upper hand fully coated	5

Detectable Mechanical Work Gloves

An ideal glove which can be used in both indoor and outdoor areas. It provides mechanical power while performing work. Oil and water easily glides down the surface of the glove and also its texture provides it to clutch the surfaces firmly. Cotton lined and can be manufactured in lengths requested up to the wrist, elbow or shoulder. Durable against oil, grease and various. Suitable for work that requires up to the elbow or part of the arm, dye industry and sanding machine.
Conforms to standard EN 388 (2111).
Sizes available - 7,8,9,10,11.
We can supply a whole range of detectable nitrile gloves for various applications.
Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

CODE	DESCRIPTION	PACK QTY
DTM DNDB 27	Reinforced and seamless cuff, completely coated	5

CK 2405+	FFP2 NRD - Blue for visual detection (Moulded)	20

Detectable Disposable Earplugs

Detectable disposable foam earplugs providing extremely economical and comfortable all day protection. Hygeinically sealed one pair per bag. Comes complete with a metal tagged Blue PVC Cord and offers protection at SNR 37DB. Detectamet disposable earplugs are highly detectable by metal detection systems.
Meeting the requirements of EN352-2 and are CE-Marked in accordance with the requirements of European Directive 89/686/EEC.

CODE	DESCRIPTION	PACK QTY
DTM 0202	Blue Cord and Yellow Earplug	100

Detectable Spark Plugs

The detectable disposable earplug DTM 0206 comes complete with a metal insert inside the foam plug and is available with PVC Cord or non corded version, and offers protection at SNR 37DB.
Meeting the requirements of EN352-2 and are CE-Marked in accordance with the requirements of European Directive 89/686/EEC.

CODE	DESCRIPTION	PACK QTY
DTM 0206	Detectable blue spark plugs	200
DTM 0207	Small spark plug dispenser	8 x 250
DTM 0208	Large spark plug dispenser	8 x 500

Detectable Earplug Storage Box

The box is manufactured from our unique high impact resistant metal detectable plastic, it has 3 drain holes (2 in the bottom and 1 in the top) to assist with drainage, for items such as ear plugs after they have been washed etc.

CODE	DESCRIPTION	PACK QTY
DTM 0240../B./R. /G. /Y. /W	63 x 42 x 24 mm Detectable	1
DTM 0241../B. /R. /G. /Y. /W	63 x 42 x 24 mm Non-detectable	1

Detectable Expandaband

This unique product has been designed to ensure maximum comfort. The adjustable detectable pressure band allows the wearer to adjust the pressure exerted into the ear canal to suit their own comfort factor. Used with the sonar detectable earplugs 2 and 3 flange. Expandaband allows earplugs to be clear of work surfaces to avoid cross-contamination.
Can be worn under the chin or behind the head.
Meeting the requirements of EN352-2 and are CE-Marked in accordance with the requirements of European Directive 89/686/EEC.
Colours available - Blue, Green, Red, Yellow

CODE	DESCRIPTION	PACK QTY
DTM 0203	expandaband - 2 flange	20
DTM 0204	expandaband - replacement ear plugs 2 flange	20

Detectable Reusable Sonar Earplugs

Designed for maximum comfort and performance. Made from medical grade detectable silicone rubber, these plugs are the ultimate choice for the discerning user.
The two flange patented design (SNR24) Patented product No. 69820878.1 and three flange (SNR25) exerts only sufficient pressure within the ear canal to ensure the required acoustic seal.
Meeting the requirements of EN352-2 and are CE-Marked in accordance with the requirements of European Directive 89/686/EEC.
Available corded or uncorded and in blue or red.

Detectable "Clean Ear" System

The "Clean Ear" storage box has been specifically designed to enhance reusable ear plug hygiene and safety. This box has clearly marked individual storage compartments for Left or Right plug, drain holes to allow air to pass through to assist in drying the plugs after washing / cleaning etc. Manufactured from high impact resistant plastic in both detectable and non-detectable plastic versions it is compact and lightweight (17gms) and easy to clean.

The storage box which is available as a seperate item also has a facility incorporated within the design for the user to attach a safety chain or lanyard to help keep the plugs convenient, clean and protected in between use.

The system incorporates the benefit of using different coloured ear plugs on either end of a cord or Expandaband i.e Red = Left Ear & Blue = Right Ear.

Meeting the requirements of EN352-2 and are CE-Marked in accordance with the requirements of European Directive 89/686/EEC.

detectamet
FOOD SAFE DETECTABLE PRODUCTS

Specifically designed for use within the food and pharmaceutical industries. Ideal for sack and bag tying etc.

The Detectamet range of cable ties all feature unique and innovative features.

The Detectamet Detectable cable Ties have a metal content dispersed throughout the head and strap - so even cut-off sections can be detected.

Varioius sizes incorporate internal serrations allowing for a positive hold onto cable, hose and pipe bundles. The design of the head guarantees a high tensile strength whilst allowing a very low insertion force, this, combined with the bent tail design of many of the ties, ensures a simple and quick installation.

Easily installed by hand and are suitable for the installation of cabling in and around the manufacturing process areas.

The design of the head (2 styles) guarantees a high tensile strength whilst allowing a very low insertion force, this, combined with the bent tail design of many of the ties, ensures a simple and quick installation.All ties are designed to make the task of fastening, bundling, clamping and managing wires easier.

When strength, aesthetics, reliability and performance are required, the Detectamet range of Metal Detectable Cable ties have all your requirements covered.

Detectable Nylon & Polypropylene Cable Ties

Specifically designed for use within the food, beverage and pharmaceutical industries. Ideal for sack and bag tying etc. Made from strong and durable nylon or polypropylene. As well as being detectable, the PP cable ties will float when dropped into liquid. An ideal tie to use in the beverage industries and relevant food environments.

Detectamet
FOOD SAFE DETECTABLE PRODUCTS

The "Detectamet" range of Tags allow small traces of label fragments to be detected, at any stage in the production process. As well as detecting any actual contamination before delivery to its customers, food / pharmaceutical companies will also be able to use the range as a vehicle to print production and batch information, enabling complete tractability. Additional information can also be added to the Detectamet labels & tags in the range.

DETECTABLE KEYHOLE TAGS & LABELS

DETECTABLE KEYHOLE TAGS & LABELS

Detectable Standard Keyhole Tags (Small)

Detectamet standard keyhole tag features heat and strength resistance with all round durability - this tag will suit 80% of applications.

Detectamet Tag is a quad laminate material used for tags designed for the food processing environments and detectable by end of line metal detectors.

Tag Colour Available

Pantone Yellow, Pantone Orange, Red, Rhodamine Red (Magenta),White, Blue, Green, Brown, & Black

Size 25 x 190mm

We can supply other sizes if required. Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

Can be used in conjunction with our Detectamet Dry-Wipe pens, Marker Pens & Fine Marker Pens! Alternatively we can print you own personal requirements onto the tags.

Detectamet
FOOD SAFE DETECTABLE PRODUCTS

Detectable X & XV Keyhole Tags

For customers who have an environment with particularly high heat and steam areas we are to offer our customers the Detectamet X & XV Tag.

Detectamet X Tag - Tri-laminate material. This tag has low tear resistance but suitable for high heat applications.

Detectamet XV - Quad-laminate material. This is our highest quality tag for extra strength and suitable for high heat applications.

Various size options continuous non-adhesive tag, waisted and hole punched with perforations between each tag.

Printing: Nil or option to print is available. Minimum order quantity applies.

Can be used inconjunction with our Detectamet Dry-Wipe pens, Marker Pens & Fine Marker Pens! Alternatively we can print you own personal requirements onto the tags.

Detectable Plastic Tags

The ID tags have been developed to allow small traces of label & tag fragments, at any stage of the production process.

As for any food/pharmaceutical processing most commonly takes place across a number of areas in a production facility, contamination cases can often occur at any time.

Typical Applications include:·
- HSE/LOLER and PUWER legislative compliance
- Store and security checking
- Moveable equipment tagging
- Wire & cable colour coding
- Machine Isolation details
- Drum & pallet / container tracing
- Plant & sampling labelling
- Insurance company requirements etc.

Can be used in conjunction with our Detectamet Dry-Wipe pens, Marker Pens & Fine Marker Pens! Alternatively we can print you own personal requirements onto the tags.

sales@detectamet.com
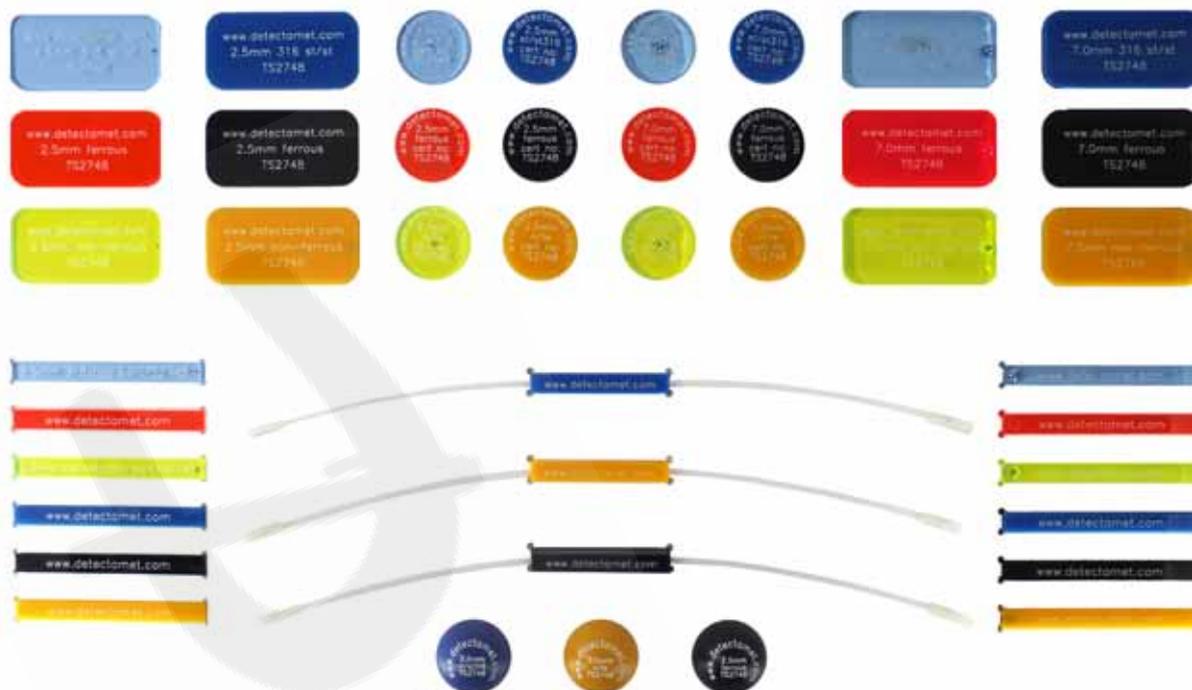

Detectamet can manufacture a complete range of precision metal detector test pieces. Each TESTICK is colour coded for simple visual verification and fitted with a calibrated and certified bearing to ISO9002 and AFBMA Calibration.

We have developed a range of test products for X-Ray Machines which includes low, medium and high density materials acting as the medium and combining these with test contaminants of varying densities.

With our experience of producing high quality test pieces for metal and X-ray detection in the food and pharmaceutical industries we've found it increasingly beneficial to our clients to make information easily available for quality assurance purposes. All Test Pieces are supplied with a full certificate of conformity which we will keep a record of for you for 3 years.

Each Test Piece has a number etched onto its side which relates back to the Certificate of Conformity supplied by the bearing manufacturer. When our Testpieces are purchased from Detectamet our name will also be etched onto the Test Piece - allowing you or any member of staff to trace it back to us. Alternitavley we can add your company name upon request.

We can also etch extra numbers on to the Test pieces if required - to allow for individual identification purposes such as shift workers or issue numbers etc.

This ease of access coupled with a high quality manufacturing process, simple visible detection and colour coded verification makes Detectamet Test pieces a very cost effective way of managing the important aspects of safety through quality control.

Used in the following Industries:
- Metal Detector Manufacturer
- Metal Detector Service Industry
- Food Processing & Food Safety
- Pharmaceutical
- Clothing/Garment Inspection
- Footwear manufacturer

METAL & X-RAY DETECTOR TEST PIECES

Detectable Storage Boxes

A versitile detectable storage box with clip fastening lid. Useful for any number of applications from holding test pieces, first aid dressings, coins and keys etc. The products in this range are all produced from a specially formulated material based on high impact food safe polypropylene. This material has the ability to be detected and rejected by typical metal detection and x-ray machines used in the food processing industry.

A4 & A3 Anodised Aluminium Ring Binders

This product has been manufactured from high quality aluminium, available with 2, 3 and 4 rings.
Benefits Include:
* Manufactured from top quality, stylish Anodised Aluminium.
* Ideal for production area environments or for archiving important documents.
* Heavy duty and lightweight - beneficial if used during audits and daily record taking
* Ability to wipe clean

CODE	DESCRIPTION	PACK QTY

A5, A4 & A3 Anodised Aluminium Clipboards

The aluminium clipboard has been developed with food, pharmaceutical, health and catering industries in mind.
Benefits Include:
* Manufactured from top quality, stylish Anodised Aluminium.
* Ideal for production area environments or for archiving important documents.
* Heavy duty and lightweight - beneficial if used during audits and daily record taking
* Ability to wipe clean
* Comes with stainless steel clip (except DTM A66210)
* Stainless steel clip can be etched with your company details

FOOD SAFE DETECTABLE PRODUCTS

STORAGE, MIXING & HANDLING EQUIPMENT

From food processing and brewing, through distribution and storage to serving food, installing Detectamet stainless steel equipment brings unique benefits to the food and pharmaceutical industry.

One of the great advantages of the Detectamet stainless steel range is that it imparts no taste to the food/products that is prepared on it. Typical uses include kitchens, dairies, ham curing and fish storage. The grades used by Detectamet are 304, for ambient temperatures and low acid concentrations, and 316 for harsher environments. For example 304 is used in cheese and dairy production, but where salted (ham) products is being prepared 316 is used. In ice cream production /processing 316 is specified because strong anti-bacteriological cleaning and rinsing systems are used.

A further advantage is that stainless steel is resistant to damage caused by condensation cycles in high humidity areas such as kitchens etc. The Detectamet range also incorporates the use of other suitable metals for food applications such as aluminium and brass. Declarations of conformity are available on request.

www.detectamet.com
sales@detectamet.com

Detectamet has developed a wide range of detectable engineering materials and equipment for the food and pharmaceutical industries. This part of our product range grows yearly, as we continue to provide solutions for our customers. Not only can we offer the standard products in this catalogue, but also provide a bespoke design and development service which is provided by a team of dedicated staff.

DETECTABLE ENGINEERING PRODUCTS

detectamet
FOOD SAFE DETECTABLE PRODUCTS

Detectamet Detectable Silicone Rubber Sheet

Metal Detectable Rubber Sheet. Impregnated Silicone Calendered Sheet Grade.

Available in 1.5mm, 2.0mm, 3.0mm, 5.0mm and 6.0mm as standard (minimum order 2mt x 1mt. also available in 1mt increments up to 10mt long).
Heat Stabilising Available 300mm wide only - please contact us direct for details.

This product contains only ingredients that are listed by the American Food & Drugs Administration (FDA) under the 21 CFR number 177-2600.

Typical Applications: Metal detectable seals, gaskets, joints and strips used in sensitive food, drink and pharmaceutical applications.

CODE	DESCRIPTION	PACK QTY
DTM 0605	Sheet size 2m x 1m (longer lengths available POA) - 2m x 1m x 1.5 mm thick	1
DTM 0606	Sheet size 2m x 1m (longer lengths available POA) - 2m x 1m x 2 mm thick	1
DTM 0607	Sheet size 2m x 1m (longer lengths available POA) - 2m x 1m x 3 mm thick	1
DTM 0608	Sheet size 2m x 1m (longer lengths available POA) - 2m x 1m x 5 mm thick	1
DTM 0609	Sheet size 2m x 1m (longer lengths available POA) - 2m x 1m x 6 mm thick	1

Detectamet Detectable Silicone Rubber Extrusions

Detectamet are able to offer a metal detectable rubber silicone extrusion for general purpose compound having good mechanical properties. Features include good heat stability inside temperature range, supplied in specific colour; blue. The popular use of this product is found in Food and Dairy, Bakery, Beverage, Pharmaceutical and OE Markets.
A metal detectable general purpose compound having good mechanical properties. Features include good heat stability inside temperature range, supplied in specific colour; blue.
All the constituents in this compound conform to FDA regulation 21 CFR 177.2600.

Shore hardness; 75° +/- 5°
Elongation at break; 320 %
Tensile strength; 8.0 MPA
Tear strength; 12 KN/M
Specific gravity; 1.22
Temp range; -70°C to +200°C (with heat stabiliser up to 250°C)
Compression set; 32%

Detectamet are also avaiable to manufacture extrusions to suit your specific applications. Please contact us with your requirements.

DETECTABLE ENGINEERING PRODUCTS

Detectathene Detectable Food Grade UHMWPE

Specifically developed for the Food, Pharmaceutical, Packaging, Bottling & Canning, General Engineering Industries this unique Detectamet "Detectathene" a metal detectable ultra high molecular weight polythene is suitable for use in the following applications: *Wear Strips, Guide Rails, Corner Wearbends, Chain Guides, Bearings, Bushes, Scrapers, Rollers, Idler Wheels, Liners, General Machined Parts etc.

*In addition to these applications we are able to manufacture parts to your specification.
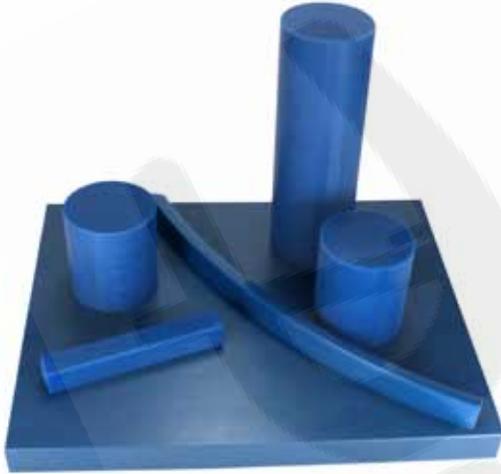

• Metal Detectable
• X Ray Visible
• Approved for direct contact with food
• Excellent wear resistance
• High Impact Resistant
• Easy to Machine
• Self Lubricating (good bearing properties)
• Abrasion Resistant
• Water repellent
• Acid resistant
• Corrosion resistant
• Vibration & noise dampening
• Blue Colour
• Chemical Resistant
• Lightweight
• Cost Effective
• Dirt Repellent
• Suitable for low temperature environments (-260 degrees + 80 degrees Celsius)

Sheet Sizes Available:
• 2020mm x 1010mm
• 3030mm x 1010mm
• 2020mm x 1220mm
• 2440mm x 1220mm
• 3050mm x 1220mm

Thicknesses Available:
• 8mm
• 10mm
• 12mm
• 15mm
• 20mm
• 25mm
• 30mm
• 35mm
• 40mm
• 45mm
• 50mm
• 55mm
• 60mm
• 70mm
• 80mm
• 90mm
• 100mm

Also available as a rod in diameter from 25mm to 200mm
Lengths available 1m, 2m and 3m.

detectamet
FOOD SAFE DETECTABLE PRODUCTS

Detectamet Detectable Acetal

- Good balance of stiffness and impact strength for applications where higher dimensional stability is required.
- Metal and visual detection by blue colour
- Detection by x-ray also possible
- Continuous use temperature up to 105 Celsius (221 Fahrenheit)

Applications
- Scrapers
- Funnels
- Guiders
- Grippers
- Gears

Sizes
- Extruded Rods 30/50/80mm x 1000/3000mm
- Extruded Plates 20/40/80 x 610 x 1000/3000mm
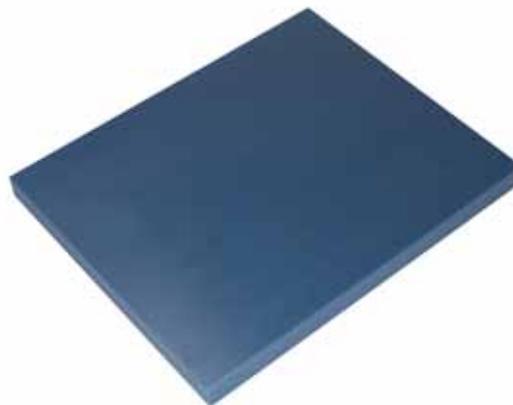

Detectamet Detectable PA6 Filled

High wear and fatigue resistance
Lower moisture absorbtion than standard PA6
Metal and visual detection by blue colour
Detection by x-ray also possible
Continuous use temperature up to 85 Celsius (185 Fahrenheit)

Applications
- Thrust Washers
- Seals
- Rolls

Sizes
- Extruded Rods 30/50/80mm x 1000/3000mm
- Extruded Plates 20/40/80 x 610 x 1000/3000mm

Detectamet Metal Detectable O - Rings

specifically developed to meet the stringent demands of the food and pharmaceutical industries. The New Detectamet Metal Detectable range of O-Rings includes FDA compliant (on most sizes) or food safe grades of EPDM, Niitrile and Fluorocarbon (FKM) compounds.
Available in blue, grey and black, Detectamet **NEW** Metal Detectable O-Rings have been tested and proven in use at leading food and pharmaceutical manufacturing / processing plants.

Fragments of Detectamet as small as 2mm can be identified by metal detector equipment.

Features of Metal Detectable O-Rings include:
• Early detection and containment of contamination
• Reduced product loss
• Increased productivity
• FDA compliant elastomer materials
• Free from animal derived ingredients
• Tempertaure range from – 40 Degress C to + 200 Deegress C
• Blue seals to assist in easy identification
• Detectamet compounds can be moulded into O-Rings and custom components
• Detectamet O-rings available from 0.25mm to over 2 metres in diameter, in any combination of ID and cross section, both in small quantities and large volumes.

Material Options
- FKM/FPM
- NBR or BUNA N
- EPD/EPDM
- Silicone

Please contact our technical team with your specific requirements.

www.detectamet.com
sales@detectamet.com

DETECTABLE ENGINEERING PRODUCTS
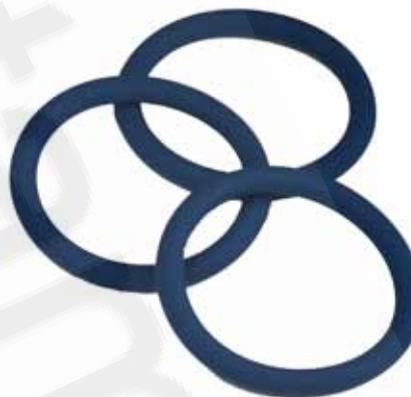

Detectable Food Grade Belting

Metal detectable Plastic. Polypropylene, Polyethylene, Acetal materials.

Straight running and side flexing versions.
Closed top to 60% open area.
Suitable for dry, wet and frozen applications.

Please contact our technical team with your specific requirements.

Detectathane Polyurethane Belt

Detectathane is part of a new series of film grade polyester-based thermoplastic polyurethanes (TPU), specifically targeted for extruded profiles, film and sheet applications, molded parts, and other high end extrusion applications. Detectathane exhibits excellent abrasion resistance and toughness, and conforms to FDA food contact directives and has been approved for use by the USDA. (Equipment Acceptance Certificate)
For technical data please see our website - www.detectamet.com
Detectamet are also avaiable to manufacture extrusions/belts to suit your specific applications. Please contact us with your requirements.

CODE	DESCRIPTION	PACK QTY
Standard Belt

V Belt		
DTMPUV Z	Coil length = 30m - Z section	1
DTMPUV A	Coil length = 30m - A section	1
DTMPUV B	Coil length = 30m - B section	1
DTMPUV C	Coil length = 30m - C section	1

Detectamet
FOOD SAFE DETECTABLE PRODUCTS

Detectamet Detectable PTFE

Detectable Teflon. Metal Detectable PTFE for use in the Food Industry by Detectamet.
Suitable for scrapers, wearstrips, bushes in high temperature applications.

• Chemical resistant.
• Corrosion resistant.
• Can withstand temp of +260 degrees and down to -260 degrees.
• FDA complient

Available as semi finished product or machined components.

Please contact our technical team with your specific requirements.

Detectable Hand Tools

A wide range of precision engineering hand tools for industrial maintenance. Manufactured from 304 grade stainless steel. Made in England to high quality standards.

Stainless Steel Range Includes -
* Adjustable Wrenches: 6, 8 and 10 inch.
* Chisels.
* Hex Keys: 3 to 10mm.
* Parallel Pin Punches.
* Hand Scrapers.
* Pliers: Lineman's, Diagonal Side Cutters, Long Nose,
  Water Pump etc.
* Screwdrivers: Slotted, Phillips (handle is not autoclave able), Square Drive Sockets, Extension Bars, Ratchets.
* Spanners: Combination, Double Open End, Double Ring
  End etc.

We can supply a whole range of hand tools for various applications. Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

Detectable Mallets

Detectable Plastic Hammer/Mallet incorporating detectable plastic head. The handle is standard plastic. The Hammer/Mallet offers high impact, durability and high abrasive resistance.

* Made in the UK to high quality standards.
* Resistant to corrosion and most chemicals.
* Will not fracture, splinter or delaminate.
* Detectamet Detectable Plastic Hammer/ Mallet head is fitted to plastic handle to meet with Food Hygiene Regulations.

Small Detectable Mallet Weights & Dimensions:
* Length = 300mm
* Head = 115mm Wide, 50mm Diameter
* Weight = 330g

Large Detectable Mallet Weights & Dimensions:
* Length = 300mm
* Head = 125mm Wide, 76mm Diameter
* Weight = 746g

ck Safety

A Detectamet Ltd Group Company

Our range of personal protective equipment includes respiratory, hearing and hand protection. All our products are manufactured in the United Kingdom by CK Safety Ltd, a Detectamet Limited Group Company. All our products have been designed and manufactured to meet the standards of our ISO 9001 Quality System. Products are tested and certified to the relevant European Standards. Full certificates of conformity are supplied.

In addition to our PPE, our safety products cover a range of practical and general safety equipment.

CK Half Mask Respirator

Our half mask respirator used with twin filter cartridges meets the requirements of EN140:1998 – being made from either Medical Grade PVC or TPE. The CK range of masks are compatible with all CK cartridges and other leading brands of which we can advise you.

Our half mask respirator has been providing protection against dust, mist, fumes, vapour and gas to a variety of industries, supplied through our network of professional PPE distribution for 20 years.

Available with adjustable elastic strap or head harness.

- Twin filter mask combines comfort and protection with low breathing resistance.
- Rolled edge around face seal ensures maximum comfort, preventing soreness on the face
- Accepts CK series, particulate and combined filters to provide protection in a wide variety of applications
- Filters supplied separately
- Head harness or strap provide even weight distribution
- Moulded head strap fixing points prevent leakage which may occur when using respirators with stud fittings
- Low profile and side filters for unobstructed field of vision
- One size
- Standard: EN140, EN14387,EN143

CODE	DESCRIPTION	PACK QTY
CK1004 CK1004 H (with harness)	Twin respirator with side mounted cartridge PVC Blue/Black available with or without head harness	1
CK1003 CK1003 H (with harness)	Twin respirator with side mounted cartridge TPE Blue/Black available with or without head harness	1

CK Replaceable Filters

CK 2600 series - For use with Twin filter half mask respirator (CK1003, CK1004) Our filter cartridges provide protection against dust, mist, fumes, vapour and gas to a variety of industries, supplied through our network of professional PPE distribution outlets. Conform to BSEN 14387:2004 for Respiratory gas filters and combined filters, vapours & particulates. Our P2 & P3 filters are all tested to conform to BSEN 143:2000 for dust particulates.

We can supply a whole range of replaceable filters other than those listed below. Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

DTM3003v M/D	Detectable Filtering face piece/toxic dusts c/w valve FFP2 (Fold flat)	10
CK 2405+	FFP2 NRD - Blue for visual detection (Moulded)	20

CK FIT Testing

RPE Fit Testing is required for all tight-fitting facepieces including all filtering facepieces (disposable face masks), half masks and full-face masks. This includes negative pressure full-face masks as well as power-assisted full masks, and both self-contained and air-fed breathing apparatus.

Information Document HSE 282/28, recommends that RPE Fit Testing should only be conducted by a trained competent person.

The COSHH (Control of Substances Hazardous to Health) Regulations include a requirement that the initial selection process for all tight-fitting facepieces should include face-fit testing to ensure the wearer has a correctly fitting device. Face-Fit Testing is also required under the Control of Asbestos at Work Regulations and the Control of Lead at Work Regulations.
To be competent, the fit test operator should have adequate knowledge and have received adequate instruction and training in the following areas:
· Regulations and Guidance
· The Purpose and Applicability of Fit Testing
· Procedures for Selection of Adequate and Suitable RPE
· Fit Factors and Protection Factors
· Examination Procedures for RPE, Identification of Maintenance Problems
· Correct Donning Procedures and Pre-Use Fit Checks
· Qualitative and Quantitative Face-Fit Testing
· Sampling from the Facepiece
· Diagnostic Checks on Equipment
· Correct Fit Testing Procedures, Purpose of the Fit Testing Exercises
· Problem Solving
· Capabilities and Limitations of the Fit Testing Equipment
· Interpretation of Results

PPE & SAFETY PRODUCTS

CK Silent Fit (Non-Detect) & Sonar (Detectable) Earplugs

Manufactured by CK Safety here in the UK, this range of reusable earplugs has been designed for maximum comfort and performance.

Made from medical grade silicone rubber, these plugs are the ultimate choice for the discerning user.

Meeting the requirements of EN352-2 and are CE-Marked in accordance with the requirements of European Directive 89/686/EEC. Available with or without cord.

The two flange patented design (SNR24) Patented product No. 69820878.1 and three flange (SNR25) exerts only sufficient pressure within the ear canal to ensure the required acoustic seal.

Available corded or uncorded and in blue, green, orange and yellow.

We recommend to use with the clean ear system. Left ear plug can be colour coded in an alternative colour to the right ear.

CODE	DESCRIPTION	PACK QTY
CK 5114	2 flange Non detectable silicone ear plug pairs	200
CK 5115	2 flange Non detectable silicone ear plugs on lace cord (pairs)	100
CK 5116	2 flange Non detectable silicone ear plugs on PVC cord (pairs)	100
CK 5117	2 flange Non detectable silicone ear plugs on silicone cord (pairs)	100
CK 5118	3 flange Non detectable silicone ear plug pairs	200
CK 5113	3 flange Non detectable silicone ear plugs on lace cord (pairs)	100
CK 5119	3 flange Non detectable silicone ear plugs on PVC cord (pairs)	100
CK 5112	3 flange Non detectable silicone ear plugs on silicone cord (pairs)	100
DTM 0205	Sonar Detectable cord & plug - 2 flange	
DTM 0201	Sonar Detectable cord & plug - 3 flange	

CK Expandaband Semi Aural (Non-Detect & Detectable)

This unique product has been designed to ensure maximum comfort. The adjustable pressure band allows the wearer to adjust the pressure exerted into the ear canal to suit their own comfort factor. Used with the NEW CK Silentfit Earplugs 2 and 3 flange.

Expandaband allows earplugs to be clear of work surfaces to avoid cross contamination.

Can be worn under the chin or behind the head.

Colours available (non-detectable - Blue, Green, Orange and Yellow

Colours available (detectable) - Blue and Red

CODE	DESCRIPTION	PACK QTY
CK 5140	Expandable head band complete with 2 flange non detectable ear plug pairs	20
CK 5141	Replacement ear plugs for CK5140	50
DTM 0203	Detectable expandaband - 2 flange	20
DTM 0204	Detectable expandaband - replacement ear plugs 2 flange	20

CK "Clean Ear" Hygienic Ear Plug System

The "Clean Ear" storage box has been specifically designed to enhance reusable ear plug hygiene and safety. This box has clearly marked individual storage compartments for Left or Right plug, drain holes to allow air to pass through to assist in drying the plugs after washing / cleaning etc. Manufactured from high impact resistant plastic in both detectable and non-detectable plastic versions it is compact and lightweight (17gms) and easy to clean.

The storage box which is available as a separate item also has a facility incorporated within the design for the user to attach a safety chain or lanyard to help keep the plugs convenient, clean and protected in between use.

The system incorporates the benefit of using different coloured ear plugs on either end of a cord or Expandaband i.e. Red = Left Ear & Blue = Right Ear.

Meeting the requirements of EN352-2 and are CE-Marked in accordance with the requirements of European Directive 89/686/EEC.

CODE	DESCRIPTION	PACK QTY
DTM 0241	Non-detectable plastic storage box 63 x 42 x 24mm	1
DTM 0240	Detectable plastic storage box 63 x 42 x 24mm	1
CK 5131	Metal Safety Chain (neck chain) for ear plug storage boxes	1

Detectable Food Handling Vinyl Glove

The Detecta-Glove is a patent protected product. Made from detectable food contact safe vinyl and is powder free to avoid corn dust contamination. The material we use offers formulated comfortable fit and tactile sensitivity. A disposable glove which protects the hands while E.G. cleaning and cooking. Suitable for preparing vegetables, foods with a high water content, dairy products and pickled foods.
Please be aware: Detecta-Gloves are free of DOP (di-octyl-phtalate) but contain small traces of DEHP which are acceptable to European Standards.
This glove is suitable for use with all foods but with the exception of fatty foods.

CODE	DESCRIPTION	PACK QTY
DTM 0103	Vinyl Gloves - extra large	100
DTM 0102	Vinyl Gloves - large	100
DTM 0101	Vinyl Gloves - medium	100
DTM 0100	Vinyl Gloves - small	100

Detectable Mechanical Work Gloves

A heat proof detectable nitrile coated glove providing flexibility. Mechanical resistant and oil proof. Resistant to friction, tearing and cutting. Has superior piece clutching aspect both wet and dry pieces. Suitable for general protection, assembly, transportation, agricultural work and others.100% cotton interlock lining.
Conforms to standard EN 388 (3121).
Sizes available - 5,6,7,8,9,10,11.
We can supply a whole range of detectable nitrile gloves for various applications. Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

CODE	DESCRIPTION	PACK QTY
DTM DNPR 16	Woven cuffed, upper hand part coated	5

Detectable Mechanical Work Gloves

Flexible and comfortable, taking the shape of the hand easily. Resistant to friction, tearing and cutting. Increases labour force in terms of performing work and holding the materials thanks to its special detectable nitrile coating it doesn't show oil or dirt. Has superior piece clutching aspect both wet and dry pieces.
Suitable for greasy environments, pressing, heavy metal work and iron sheet cutting. Durable against oil.
Conforms to standard EN 388 (4121).
Sizes available - 5,6,7,8,9,10.
We can supply a whole range of detectable nitrile gloves for various applications. Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

CODE	DESCRIPTION	PACK QTY
DTM DNDB 16	Woven cuffed, upper hand fully coated	5

Detectable Mechanical Work Gloves

An ideal glove which can be used in both indoor and outdoor areas. It provides mechanical power while performing work. Oil and water easily glides down the surface of the glove and also its texture provides it to clutch the surfaces firmly. Cotton lined and can be manufactured in lengths requested up to the wrist, elbow or shoulder. Durable against oil, grease and various. Suitable for work that requires up to the elbow or part of the arm, dye industry and sanding machine. Conforms to standard EN 388 (2111).
Sizes available - 7,8,9,10,11.
We can supply a whole range of detectable nitrile gloves for various applications. Please contact us direct on 0044 (0)1759 304200 to discuss your requirements.

CODE	DESCRIPTION	PACK QTY
DTM DNDB 27	Reinforced and seamless cuff, completely coated	5

PPE & SAFETY PRODUCTS

CK Siren Loudhailer

Professional high output megaphone with an effective audible distance of up to 1 km.

The product has a sturdy pistol grip with on/off switch and has a built in microphone, volume control, high SPL output , shoulder strap and switchable siren. The product can be powered using 8 C cell batteries (not supplied) or via a 12 V DC input (plug not supplied).

Manufactured from high grade ABS plastics this product is ideal for all weather use. Due to a very high SPL this unit is only suitable for outdoor use or very large indoor areas.

CODE	DESCRIPTION	PACK QTY
S/N 8139	Siren Loudhailer	1

CK Salt / Grit Bin

6 cu ft Salt/Grit Bin
Cost effective and very economically priced weather resistant UV stabilized Polyethylene
Forklift channels in the base.
Holds approx. 175kg of Grit Salt
Large opening for ease of use.
Forklift channels in the base.
Will nest 10 high / x 20 per pallet
Available in the following colours:
Yellow, Light Blue, White, Light Green, Red, Light Grey, Maroon, Dark Blue, Black, Orange, Dark Grey, Dark Green
12 cu ft Salt/Grit Bin
Details as above but will nest 8 high / x 16 per pallet
Holds approx. 375kg of Grit Salt
Large opening for ease of use.

CODE	DESCRIPTION	PACK QTY
GB 175	6 cu ft Salt/Grit Bin	1
GB 375	12 cu ft Salt/Grit Bin	1

CK Snow Scoops & Pushers

Don't get stuck in the snow this winter!
Manufactured from Tough Durable Plastic with a Steel Reinforced Edge. The snow scoop is a must for any home or business premises, additional handles can be purchased (as per the illustration) to assist with Snow Clearing etc on model SSWPH 500WP R.

CODE	DESCRIPTION	PACK QTY
SSWPH 500WP R	Snow scoop with wooden pole and support handles pole diam 38mm, length 1300mm, scoop 440mm wide, 400mm deep.	1
SSWP 15 O	Snow scoop with orange blade with wooden pole length 1582mm, 398mm wide, 362mm deep, weight 1232g.	1
SPWP 17 O	Pusher with orange blade with wooden pole length 1544mm, 431mm wide, 324mm deep, weight 1084g.	1

CK Snow Scrapers & Hand Scoops

Manufactured from Tough Durable Plastic. Our range of snow scrapers and hand scoops work in conjunction with our grit bins, snow scoops and pushers. Covering you for every eventuality the winter months may bring.

CODE	DESCRIPTION	PACK QTY
SS11	3" Snow scraper - Red	1
SS12	4" Snow scraper - Red	1
SS40	500g Hand scoop - Red	1
SS42	1000g Hand scoop - Red	1
