## Energy Saving Safety Blowgun

**Product code:** 45400

Energy Saving Safety Blowguns from Meech combine an ergonomic lightweight gun handle with the Meech Air Saver Nozzle.

The innovative nozzle design forces compressed air through an adjustable circular slot and then directs it at high velocity over the outside of the nozzle cone. The design amplifies the output airflow by entraining the ambient air at a 25:1 ratio.

Meech blowguns typically save up to 70% of compressed air usage compared to conventional types of blowgun whilst dramatically reducing noise levels.

### Features

Innovative design

No moving parts

Adjustability

Ergonomic handle

Lower noise levels

Lower compressed air usage

Energy Saving

Available in aluminium or stainless steel

### Benefits

Giving 25:1 air amplification

Low maintenance

Application specific set-up. Leading to hundreds of different applications

Operator comfort

Up to 50dBA noise reduction - health and safety compliant

Lower running costs and in turn lower energy bills

Can dramatically cut compressed air usage

Suitable for a wide range of industries

### Technical Characteristics

Dimensions (mm)

(H)150 x (L) 140
