Energy Saving Safety Nozzle

Product code: 48009

Energy Saving Safety Nozzles from Meech can save up to 70% of compressed air demand whilst dramatically reducing noise levels.

The innovative nozzle design forces compressed air through an adjustable circular slot and then directs it at high velocity over the outside of the nozzle cone.

The design amplifies the output airflow by entraining the ambient air at a 25:1 ratio.

Features

Innovative design

No moving parts

Adjustability

Lower noise levels

Lower compressed air usage

Energy Saving

Compatible with Meech Blowgun

Available in aluminium and stainless steel

Benefits

Giving 25:1 air amplification

Low maintenance

Application specific set-up. Leading to hundreds of different applications

Dramatic reduction of noise levels compared to "open pipe" - compliant with health and safety requirements

Lower running costs and in turn lower energy bills

Can dramatically cut compressed air usage

Opening up even more uses

Suitable for a wide range of industries

Technical Characteristics

Dimensions (mm)

(H)21, (L)49
