

FESTINA BAGSEALER

Sagbil packaging machines produces a manuel type bagsealers, marking on tie with thermal transfer over printers for a wide range of products and industries. Predominantly designed for the bakery industry the FESTINA can also be applied to the Fruits and vegatables produce market and both chilled and frozen meat industries products and milk industry products.

The easy open tape seal makes it ideal for customers that need the bag to be opened several times and re-sealed in order to maintain freshness of product. The thermal transfer printer allows essential point of the information such as trace-ability codes, best before dates, product prices, barcode etc. to be printed during the sealing procedure, removing the requirement for addition labels to be applied.

Easy to open and reseal.
