TAPE-SEALER FOR STANDARD-SIZE CARTON BOXES

A machine for the automatic sealing of standard-size carton boxes (units with fixed height and width). Two simple and fast manual hand-wheel adjustments allow the setting of the machine to the required box size. The bottom and the top flaps are simultaneously sealed (the carton box must be introduced in the machine with the top flaps already closed). Ideal solution for carton boxes with a maximum 50 cm width and height.

SPECIFICATIONS

- Side pressure rolls with 3 wheels positioned in multiple places, for a better side pressure of the carton (to keep the upper flaps approach even in the presence of bulging/swollen/filled cartons)
- Millimeter scale fitted as standard on the machine frame, for an easy and quick adjustment of the upper assembly depending on the height of the carton which has to be taped
- Device "close three flaps" to facilitate and speed up the inclusion of carton... with a consequent increasing of the productivity
- Max width of the cartons: 500 mm
- Max height of the cartons: 500 mm
- Min width of the cartons: 100 mm (if the carton has a minimum height of 110 mm)
- Min height of the cartons: 100 mm (if the carton has a minimum width of 150 mm)
- Taping head with a new roll to reduce noise during the detachment of the mother tape, during the conducting of the tape
- Blue color (main structure of the machine) and yellow color (moving parts)

NASTROPACK T&B EV

CASE TAPE MACHINE WITH TOP AND BOTTOM DRIVING SYSTEM

The best solution to close the most unstable carton boxes

SPECIFICATIONS

- Appearance: more vivid color, modern, fresh... and still improved machine structure in several small parts
- Millimeter scale fitted as standard on the machine frame, for an easy and quick adjustment of the upper assembly depending on the height of the carton which has to be taped
- Max width of the cartons: 620 mm
- Max height of the cartons: 550 mm
- Min width of the cartons: 150 mm
- Min height of the cartons: 120 mm
- Blue color (main structure of the machine) and yellow (moving parts)

TAPE-SEALER FOR RANDOM-SIZE CARTON BOXES

A machine for the automatic sealing of random-size carton boxes. The carton box must be presented to the machine with the top flaps already closed: the upper taping head and the side driving belts automatically adjust to the box dimensions. The bottom and top flaps are simultaneously sealed. The ideal solution for carton boxes with a maximum 50 cm. width and height.

SPECIFICATIONS

- Power supply: 230 V - 1 Ph - 50 Hz
- Power required: 0,6 kW
- Machine dimensions (LxWxH): 1200x900x1600 mm
- Machine weight: 220 kg
- Compressed air consumption: 3,5 NI / 6 bar
- Output: up to 30 pz/min

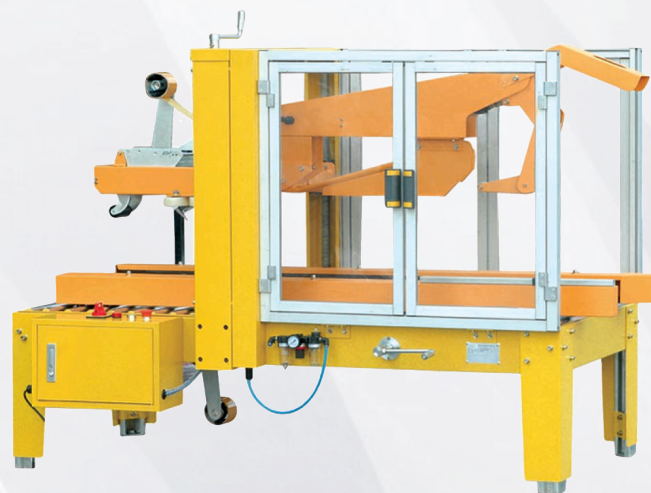

NASTROPACK NP 05 EV

TAPE-SEALER FOR STANDARD-SIZE CARTON BOXES

A machine for the automatic sealing of standard-size carton boxes (units with fixed height and width) with simultaneously sealing of bottom and top flaps of the carton box. An adjustable pneumatic working device assuring the automatic closing of the top flaps gives the possibility to position this machine, not requiring the constant presence of an operator, inside fully automatic packing lines. Two simple and fast manual hand-wheel adjustments allow the setting of the machine to the required box size. The ideal solution for carton boxes with a maximum 50 cm. width and height.

SPECIFICATIONS

- Power supply: 230 V - 1 Ph - 50 Hz
- Power required: 0,6 kW
- Machine dimensions (LxWxH): 1500x900x1600 mm
- Machine weight: 280 kg
- Compressed air consumption: 4 NI / 6 bar
- Output: up to 20 pz/min
